INTRODUCTION

Maryland local education agencies (LEAs) are required to annually account for expenditures in accordance with the budget categories identified in Section 5-101 of the Education Article of the Annotated Code of Maryland. The tables which follow contain information submitted to the Maryland State Department of Education in the FY 93 Annual Financial Report.

DEFINITIONS

Administration - expenditures for the general regulation, direction, and control of the LEA and the LEA instructional programs. Activities in this category generally involve the formulation and execution of educational or financial policy for the LEA as a whole, rather than the administration of a single building or narrow phase of school activity.

Instruction - expenditures for activities which deal with teaching regular students and/or enhancing the educational experience for students. Instructional expenditures occur at the school level for classroom instruction, media services, guidance services, psychological services, cocurricular activities, school administration, and compensatory or supplementary programs (e.g., programs for the culturally different, gifted and talented, etc.).

Special Education - expenditures for students who, through appropriate assessment, have been determined to have temporary or long-term special education needs arising from cognitive, emotional, and/or physical factors.

Student Personnel Services - expenditures for attendance services, social work services, student accounting services, etc.

Health Services - expenditures for physical and mental health activities which provide students with appropriate medical, dental, and nurse services.

Operation of Plant - expenditures for keeping the physical plants open and ready for use, including cleaning, disinfecting, heating, caring for grounds, moving furniture, and other routine activities.

Maintenance of Plant - expenditures incurred to keep the grounds, buildings and equipment in their original condition of efficiency or completeness.

Fixed Charges - expenditures of a generally recurrent nature which are not readily chargeable to other expenditure categories, such as employee benefits, rent, insurance, judgements, and other such items.

Community Services - expenditures for activities which are provided by the LEA for the community or some segment of the community other than for public school activities and adult education.

Food Services - expenditures incurred in providing meals to students or adults.

Capital Outlay - expenditures of current funds for the acquisition of, or addition to, fixed assets, including money spent for land or existing buildings, improvements to grounds, construction, remodeling, or renovations.

Debt Service - expenditures for interest or repayment of principal, excluding obligations incurred by the State of Maryland for construction of public school facilities.

Transfers - payments by one agency to another for services rendered. Transfers are differentiated from a service fee or tuition charge to prevent double accounting of expenditures between school systems.

INTRODUCTION

The public schools of Maryland are required to budget and account for expenditures according to the categories identified in Section 5-101 of the Education Article of the Annotated Code of Maryland. Final figures are submitted on November 15 of each year to the Maryland State Department of Education (MSDE) in the Annual Financial Report. *Selected Financial Data, Part 3, Analysis of Costs* is prepared from the expenditure information submitted in these reports.

The pupil measure for determining per pupil amounts may be either the Average Number Belonging (ANB) or the Average Daily Attendance (ADA). Both measures equate the number of students to the full-time equivalent count in order to properly reflect the cost of services to each students. Generally, the State of Maryland uses the cost per pupil belonging while the United States Office of Education uses the cost per pupil attending. Both figures have merit, but the cost per pupil belonging recognizes that most expenditures occur whether or not the students are in attendance or are absent.

The past two years have been exceptional periods in Maryland's history. Financial resources which were abundant during the 80's were scarce as the state experienced serious economic hardship during the recession and increasing enrollments. Per pupil expenditures, which increased by 140% from FY 80 to FY 90 have only increased by 9.5% since that period, mostly due to a 6.6% increase from FY 90 to FY 91. During the 1992-93 year, per pupil expenditures increased 2.7% over the previous year, a sign that recovery is in sight.

DEFINITIONS

Administration - expenditures for the general regulation, direction, and control of the LEA and the LEA instructional programs. Activities in this category generally involve the formulation and execution of educational or financial policy for the LEA as a whole, not the administration of a single building or narrow phase of school activity.

Instruction - expenditures for activities which deal with teaching students and/or enhance the educational experience for students, except those specifically designed for students diagnosed and served in special education programs. Instructional expenditures occur at the school level for such things as salaries, instructional materials, psychological services, guidance services, school media centers, and the office of the principal.

Special Education - expenditures for students who, through appropriate assessment, have been determined to have temporary or long-term special education needs arising from cognitive, emotional, and/or physical factors.

Student Personnel Services - expenditures for attendance services, social work services, or student accounting services

Student Health Services - expenditures for physical and mental health activities which provide students with appropriate medical, dental, and nurse services

Student Transportation Services - expenditures incurred in the conveyance of pupils to and from school activities

Operation of Plant - expenditures for keeping the physical plants open and ready for use, including cleaning, disinfecting, heating, caring for grounds, moving furniture, and other routine activities

Maintenance of Plant - expenditures incurred to keep the grounds, buildings and equipment in their original condition of efficiency or completeness

Fixed Charges - expenditures of a generally recurrent nature which are not readily chargeable to other expenditure categories, such as employee benefits, rent, insurance, judgements, and other such items

Community Services - expenditures for activities which are provided by the LEA for the community or some segment of the community other than for public school activities and adult education

Food Service - expenditures incurred in providing meals to students

Capital Outlay - expenditures of current funds for the acquisition of or addition to fixed assets, including money spent for land or existing buildings, improvements to grounds, construction, remodeling, and renovations.

Debt Service - expenditures for interest or repayment of principal, excluding obligations incurred by the State of Maryland for construction of public school facilities

Transfers - Payments by one agency to another for services rendered. Transfers are differentiated from a service fee or tuition charge to prevent double accounting of expenditures

INTRODUCTION

Selected Financial Data is an annual four-part publication of the Maryland State Department of Education prepared from information submitted by each of the 24 Maryland local education agencies (LEAs) in the Annual Financial Report. Part 1 contains information about the sources of funds. Part 2 contains information about the uses of funds. Part 3 contains information about the expenditures and wealth per pupil and provides rankings and percentage distributions of costs. Part 4 is a ten-year summary of selected data from parts 1, 2 and 3.

OVERVIEW

The Maryland LEAs are all fiscally dependent units of the 24 local governments in Maryland. Lacking an assessable tax base and having no ability to incur debt, the LEAs must compete with other government agencies for funds to operated schools and construct educational facilities. Annually, the school budget is submitted to the county/city council or the county commissioners for adoption. Once adopted, the local government is responsible for the appropriation level which has been approved.

Maryland law requires funding accounting, or the segregation of resources by purpose. Each fund consists of a self-balancing set of accounts for which revenue may be obtained from federal, state, local, or other sources. Following is a brief description of each of the funds identified on the tables which follow:

(1) The Current Expense Fund contains all accounts for general, routine current operations of the LEA. Expenditures are charged to 12 categories, some of which are further subdivided to provide sufficient detail to meet federal and state reporting requirements.

(2) The School Construction Fund accounts for all transactions relating to major school construction or remodeling projects.

(3) The Debt Service Fund accounts for the systematic repayment of principal and interest on debt. Although Maryland LEAs do not have the authority to issue bonds, they are required to acquire this information from the local government and disclose it in the Annual Financial Report.

(4) The Food Service Fund accounts for operations required to provide meals to students and staff in schools. Included are operating kitchen equipment, preparing and serving food, cleaning and storing equipment, and delivering food.

(5) The Student Activities Fund accounts for funds which are owned, operated, and managed by the student body under the guidance of the LEA staff. Included are school stores, extracurricular activities, etc. Revenue for Student Activities is not reported in the Selected Financial Data series, but expenditures are shown on Table 1 of Part 1.

(6) The Trust/Agency Fund accounts for assets that are not owned by the LEA. This fund is not reported in Selected Financial Data.

INTRODUCTION

The following report presents an analysis of salaries earned by professional staff employed in Maryland public schools. The report includes selected central office staff, school level administrators, teachers, and other professionals. The salaries are derived from local payroll records of individuals and include their annual base pay, determined by education and experience, plus stipends for longevity, extra duties, and extended contracts. Salaries of individuals employed part-time are equated to full-time.

Table 1 presents the local education agency (LEA) and statewide calculations of the average and median salary, as well as the salaries at the first and third quartiles for each position classification. Table 2 shows the average, median, and quartiles for classroom teachers grouped by regions with LEA salaries indexed to the region. Table 3 presents the average instructional salary and the percent change between October, 1986 and October, 1993.

Calculations

Average (mean) salaries, computed by summarizing individual salaries and dividing the total by the number of equivalent positions in the group, is the figure most frequently used for comparison. However, it's value is influenced by extremely high or low salaries in the distribution and may not provide a true estimate of the population average. Therefore, the median is also provided as a more stable calculation of "average salary." The median represents the salary which divides the group in half where fifty percent earn more and fifty percent earn less. The first and third quartiles provide an estimation of the distribution of salaries across the group. For example, the bottom twenty-five percent is determined by the salary of the first quartile and the top twenty-five percent is determined by the salary at the third quartile. Inspection of Table 1 indicates that the twenty-five percent of the classroom teachers in the State are paid $30,959 or less, while twenty-five percent earn a salary of $45,650 or higher.

Position Classifications

The position types used in this report are based on definitions prescribed in the Specifications and Procedures Manual for the Staff Reporting System. Directors, coordinators, and supervisors include persons in charge of instructional and administrative functions, maintenance and operation of schools, food service, health and transportation. Persons whose time is split between functions are counted once in their primary function.

INTRODUCTION

The following tables were made possible by the efforts of LEA personnel who have worked diligently to report accurate and complete information to the Maryland State Department of Education (MSDE). Each November, LEAs submit a report containing information about each staff member who was actively employed as of October 15. Each record contains information about the salary, position type, degree, years of experience, budget code, contract-months, full-time-equivalent (FTE), school level, and building code. The budget codes are prescribed by the Financial Reporting Manual for Maryland Public Schools. All budgeted positions, with the exception of hourly and contractual personnel, are included regardless of funding source.

The identification as Instructional or Noninstructional staff is determined by a combination of budget codes and position type classifications. Instructional personnel are defined as teachers, therapists, guidance counselors, school psychologists, principals, vice principals, school librarians or teacher aides. Although school secretaries perform no instructional functions, they are included with Instructional staff on Tables 5-7 because they are available to students during the school day.

The presentation on the enclosed pages reflects a slight modification over previous years. School level professional personnel with a position type other than one shown on Tables 5-7 have been included with noninstructional staff to reflect the staff in accordance with Maryland's categorical definition. Beginning in 1994-95, these personnel will appear in Instruction due to a waiver of the reporting requirement which effectively change the definitions of Instruction and Noinstruction.

INTRODUCTION

The following report presents the status of professional employees in Maryland local education agencies (LEAs) as of October 15, 1993 by assignment, race/ethnicity and gender. The tables show the Full-Time Equivalent and percent of males and females in the central office, elementary, secondary, and middle/combined schools. Staff are further classified according to the race/ethnic categories designated by the Equal Employment Opportunity Commission.

The data used to compile this report were submitted by LEAs from personnel records as of October 15, 1993. An individual record was submitted for each person employed in a budgeted position. Hourly, substitute and special contractual employees were excluded from the report.

Staff members are classified on the basis of their work assignments. These classifications correspond with position codes listed in the Staff Reporting System Guidelines for Local School Systems in Maryland. For the purpose of this report, persons with split assignments are counted once in their primary assignment.
